

Bathampton Primary School
Together on a learning adventure

Head teacher: Mr Paul Falkus B.A. (Hons)

May 2017

Dear Parents,

To develop the children's knowledge and enthusiasm for science we are going to have a **Science Day on Friday 26th May**. We have invited Mr George an enthusiastic and experienced teacher of science, to come to Bathampton Primary School. Mr George will be bringing with him an array of gadgets and equipment to provide the children with a host of thrilling and surprising science experiments.

Year groups from Reception to Year Five will start the day by watching an interactive Assembly introducing a host of scientific ideas. These will be demonstrated by practical science experiments that will surprise, enthuse and hopefully ignite the children's curiosity.

Following this, for the rest of the day, each class will take part in a Science Workshop taught by Mr George that is specifically tailored to their age group.

Mr George first visited the school in 2015 for a Science Day. It was a great success which the whole school thoroughly enjoyed.

To pay for the cost of this special Science Day we are asking for contributions of £2.50. Please pay on School Money.

I hope you will support this initiative by helping us fund this event. I think Science should be an exciting, surprising and a thought provoking subject. Hopefully this Science Day will provide a wonderful opportunity for children to have fun while learning about Science.

If you would like to help with the workshops please let your child's teacher know.

Kind regards,

Mrs Wood (Science Coordinator)
