Update from Term 4 and plans for terms 5&6...

Every activity professional working for Premier sport is assessed regularly, a minimum of once per term, this allows us to provide key development points to ensure constant improvement in our activity professionals. We ensure that every session we provide, from afterschool clubs to PE lessons, is delivered to the highest quality across the board.

Moving into Term 5&6

Going into the summer term our focus in PE lessons for both KS1 and KS2 will be on athletics and striking and fielding across all schools.

Competition Focus...

In North Somerset, we are planning to run a football tournament, KS1 athletics festival and a netball tournament. We are also planning a virtual archery tournament across Bath and North Somerset. Please register your interest now through your activity professionals. We will also be running a KS1 athletics festival in Wellow.

Baseline Measurement

One of the services we provide is carrying out baseline measurements of the children's fitness levels, which provides us with measurable data for the future.

- From this first sample of data we compile a report for the school which summarises the results for every child.

- Frequent measurements are then taken throughout the school year in order to keep evaluating the children's progress.
- At the end of the year a final report that contains results from every measurement, will be provided to the school.

We have run a baseline measurement in 4 schools in term 4 all of which have found the information very useful and we are working towards planning some **intervention sessions** based on these results.

Intervention clubs

We offer a selection of different intervention clubs based on the results of baseline measurements, these clubs include:

- Gifted and Talented clubs
- Students who are assessed at an emerging level
- Pupil premium

Intervention clubs are aimed at engaging different children in specific sports or developing certain athletic abilities in groups of children. We have been running a case study in Camerton primary school with children in groups of 4, running sport specific sessions for 30minutes with KS2. The primary aim of these sessions is to improve the key athletic abilities as suggested by the Baseline Measurement, however these sessions also help improve children's self-esteem, confidence, leadership skills and teamwork.

Lunch Clubs

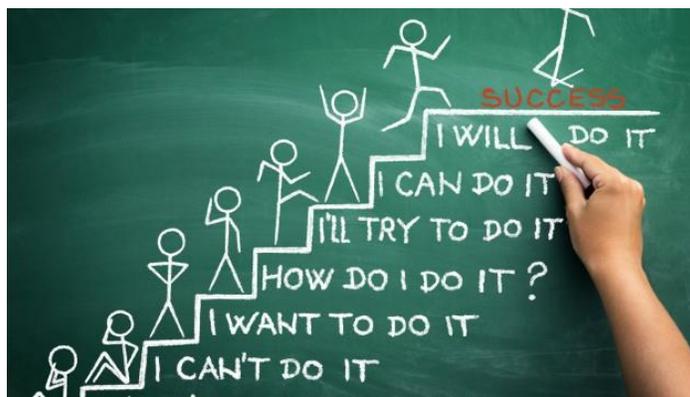

How do you get your children active during lunch time?

We offer **STAY** active sport or **Active playground sessions** where we like to try and get all children active during play time in a way that suits them. We also offer **SPORT** active which are sport specific clubs working on certain movements/ actions i.e football or netball.

Celebrating success

Our PE sessions at 3 schools in Wellow have gone from strength to strength with behaviour improving and children's sports based skills development. Attendance in our wrap around care at St Marys primary school, Yeo Moor Primary school and Wraxall Primary school have all improved and all the sessions are great fun.

Teamwork and Tactics sessions at Backwell Junior School, West Leigh infants, Bathampton Primary school and Yeo Moor Primary school have all seen great success.

Impact, We are currently putting together our impact reports for the school year to date. We would like your help, we will be sending out pupil feedback questionnaires and school feedback questionnaires, and it would be very much appreciated if these could be filled out and returned to us promptly so we can include this data in our reports. These will be made available and discussed with schools in the annual report meetings.
